

# Enjoy Eating Out? Make sure you have your Hepatitis A Vaccine

**What is Hepatitis A?** A highly contagious, short-term liver infection caused by the hepatitis A virus.

**How is it spread?** By close personal contact or by ingesting contaminated food or water, infecting an estimated 25,000 people annually in the U.S.

**Who should get the vaccine?** Children over 12 months and adults get two doses of the vaccine (or three doses if combined with Hepatitis B). Vaccines available from your medical provider or your local health department.
