

# FLU SEASON IS COMING

**Make a plan to  
get vaccinated**

During typical flu seasons, millions of people get flu, hundreds of thousands of people are hospitalized and thousands to tens of thousands of people die from flu-related causes.

Flu vaccines are available starting in the late summer and early fall. People in high-risk groups are encouraged to get vaccinated in September or October.

All adults are eligible for the flu vaccine, and can get it at a doctor or a health clinic.
