

FLU SEASON IS COMING

Make a plan to
get vaccinated

During typical flu seasons, millions of people get flu, hundreds of thousands of people are hospitalized and thousands to tens of thousands of people die from flu-related causes.

Flu vaccines are available starting in the late summer and early fall. People in high-risk groups are encouraged to get vaccinated in September or October.

All adults are eligible for the flu vaccine, and can get it at a doctor's office or a health clinic.
