

Vaccinate for Others!

Even if you have never received a COVID vaccine, you only need one dose to be up to date.

The vaccine is CDC recommended and safe for 6 months and up, especially for vulnerable people, those with chronic conditions, and those over 64.

If you are without health insurance or your insurance does not cover the full cost of the COVID vaccine, you can receive your vaccine for FREE via The Bridge Program ([vaccines.gov](https://www.vaccines.gov)).

Some people may receive both COVID and flu vaccines at the same time.
